

Response Organizer: Authentication and Passwords

Authentication

Give an example of each of the following authentication methods:

Something you know

Something you have

Something you are

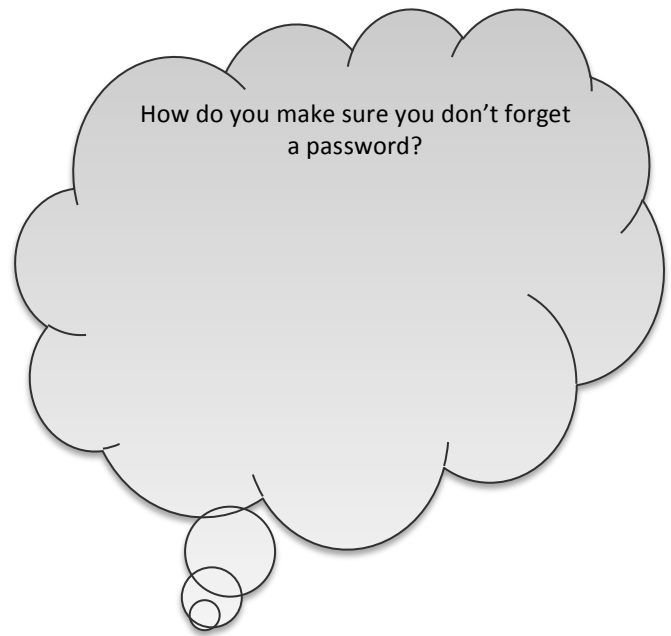

The way you do things

Priorities

Which online accounts do you think are most important to protect?

Password Management

How do *you* manage your passwords?

** Don't write down any of your actual passwords here! **

Brainstorm about advice you've heard for how to keep your passwords secure.

What's some advice you've heard about how to manage passwords?

Do you follow that advice? For which accounts?

If you don't follow the advice, why not?
